PROJECTS

1. FCFS Scheduling Simulation (C++)
 - Developed a First Come First Serve CPU scheduling simulator
 - Implemented process scheduling logic and Gantt chart visualization
2. Z-HUB Employee Management System
 - Built a system for managing employee records
 - Features include add, edit, delete, search, and display functions
3. CARELINE Patient Queue System

- Developed a patient management and prioritization system
- Improved organization of patient flow using queue logic

4. Biodiversity Monitoring System

- Designed a system for recording and tracking biodiversity data
- Supports species monitoring and environmental awareness

5. Web Development Projects

- Built responsive websites using HTML and CSS
 - Created login pages, dashboards, and UI layouts
 - Practiced frontend design and user interface development
-

CORE SKILLS

- Programming
 - Data Structures & Algorithms
 - Web Development
 - System Design & Development
 - Problem Solving
 - Graphic Design (CorelDRAW)
 - Teamwork & Communication
 - Fast Learner & Adaptability
-

PERSONAL ATTRIBUTES

- Hardworking and self-motivated
 - Strong analytical and problem-solving ability
 - Good communication and teamwork skills
 - Passionate about technology and innovation
-

INTERESTS

- Programming
 - Basketball
 - Learning new technologies
 - Graphic design
-
